Education

Vishwakarma Institute of Technology, B.Tech. in Computer Engineering – Pune, India 2022 – 2026
- CGPA: 8.82/10

Technical Skills

AI & Machine Learning: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Generative AI, Large Language Models, Retrieval-Augmented Generation

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Abstract Syntax Trees

Frameworks & Development: PyTorch, TensorFlow, scikit-learn, LangChain, Django, Flask, Spring Boot, React, REST APIs

Programming & Systems: Python, Java, C++, SQL, JavaScript, TypeScript, Linux, Git, Docker

Data & Cloud Platforms: PostgreSQL, MySQL, Neo4j, Vector Databases, Azure AI Foundry, Google Cloud, Vertex AI

Experience

Technology Analyst — Wealth Controls Technology, Citi – Pune, India July 2026 – present
- Contributing to a controls automation platform supporting diverse operational processes across Citi's Wealth domain.
- Integrate intelligent document processing capabilities to automate manual control activities and transform unstructured data into actionable information.
- Enhance application interfaces and workflows while translating business requirements into scalable automation within a regulated financial environment.

Research & Development Intern, Prescient Technologies – Pune, India Jan 2026 – Apr 2026
- Contributed to an AI Agent Studio for building and orchestrating multi-agent workflows using LangChain, Agent2Agent, and Model Context Protocol.
- Developed integrations between LLM-based agents, tools, APIs, and workflow components for practical AI application development.
- Fine-tuned an LLM for Text-to-SQL generation, achieving approximately 88% token accuracy and substantially improving performance over the base model.

Summer Intern — Personal Banking & Wealth Management, Citi – Pune, India June 2025 – July 2025
- Built an internal AI chatbot using Vertex AI and Retrieval-Augmented Generation, integrating LangChain and FAISS for document retrieval and grounded responses.
- Integrated Model Context Protocol servers and REST APIs to connect AI capabilities with automated enterprise workflows.

Sponsored Project, Regal Rexnord India – Pune, India Feb 2025 – May 2025
- Developed a task-management application using Microsoft Power Apps and SharePoint to organize and track daily operational activities, improving upon spreadsheet-based workflows.
- Worked through requirements, development, testing, and delivery using Agile methodologies.

Projects

Code Duplication Detection System – Python, AST, Program Analysis Sept 2025 – Jan 2026
AST-based logical and structural code duplication detection

- Developed an AST-based system for identifying structurally and logically duplicated code beyond conventional text or visual similarity matching.
- Analyzed program structure to identify duplicated logic even when implementations differed syntactically.

RDBMS to Graph — Relationship Discovery & Generation – Python, PostgreSQL, Neo4j July 2025 – Sept 2025

GenAI-based relationship discovery and graph generation

- Developed a GenAI-based solution for discovering relationships within relational database structures and generating graph representations for Neo4j.
- Designed data transformation and relationship-generation workflows for graph-based representation of relational data.

AI Accounting Assistant – Django, React, NLP, MySQL, Whisper.cpp Jan 2025 – June 2025

Voice-driven accounting application

- Built a voice-driven accounting application using Whisper.cpp for speech transcription and NLP-based processing.
- Enabled users to execute accounting operations through voice commands, reducing repetitive manual data entry.

PostPlus – Python, React, Django, MySQL, Traccar, Android Aug 2024 – Dec 2024

Road-transport network telematics platform

- A logistics platform for route optimization, warehouse selection, real-time tracking, and capacity utilization.
- Integrated Traccar-based tracking, mobile application support, and MIS analytics for delivery monitoring.

Leadership & Achievements

- **Winner — Smart India Hackathon 2024:** Led a six-member team to develop a solution for the Indian Post, winning among 3,000 competing teams nationwide.

Extracurricular Activities

- **Content Coordinator — VIT Social Welfare & Development Committee (2023–2024):** Created event communications and helped coordinate a police night-patrolling initiative across Pune, managing volunteers and coordinating with organizers and police stations.
- **Volunteer — Event Planning & Execution Committee, VIT (2022–2023):** Supported Melange, an inter-college competition spanning technical, sports, and extracurricular events.

Certifications

- Deep Learning Specialization — DeepLearning.AI
- Oracle Cloud Infrastructure AI Foundations Associate
- Google Cloud Computing Foundations: Cloud Computing Fundamentals
- Fundamentals of Deep Learning — NVIDIA
